

# SOPs and Best Practice for Full Arch Restorations

Thursday, April 21<sup>st</sup>, 2022

This program will provide an overview of standard operating procedures and a general overview of full arch restorations. It will also cover new technologies available to simplify the restorative process from the temporization to the final prosthesis

## OBJECTIVES

- Advantages of tissue level implants for the right cases.
- Advantages of the TLX Full Arch approach vs. ProArch with multi-unit abutments.
- Full Arch Workflow from surgical considerations to temporization to final options.
- Q&A – feel free to submit questions to Craig Zematis ahead of the session or live.
